(Times Higher Education World University Rankings, 2023)

Academics

As the leading engineering school in Hong Kong, the HKUST School of Engineering offers a wide spectrum of engineering programs

Engineering Programs

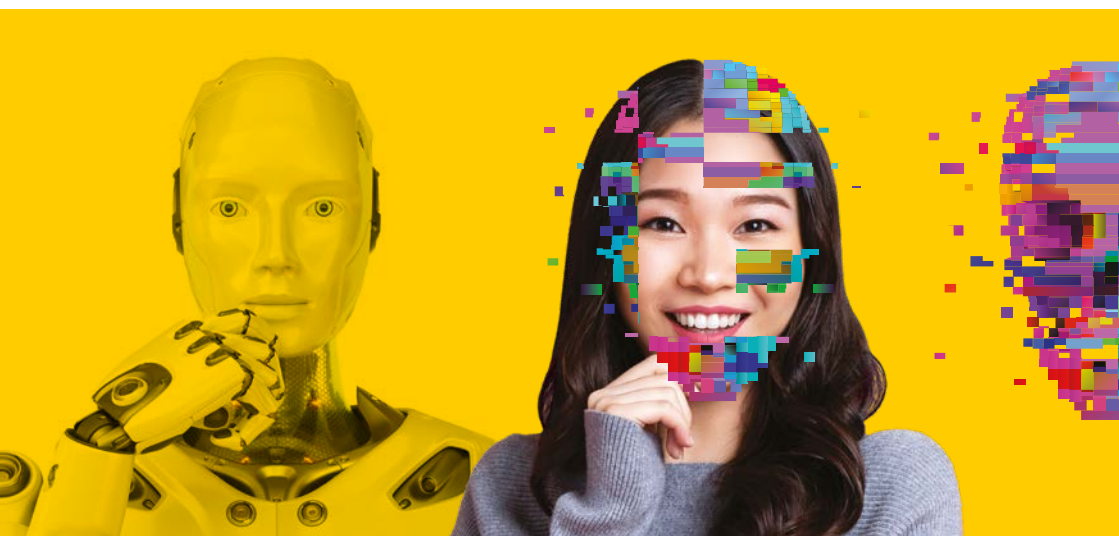

Dual Degree Program

Extended Majors

All Engineering majors can be completed with an extended major in [Artificial Intelligence](#) while most can go with [Digital Media and Creative Arts](#)

Serving with Technology

[Student Innovation for Global Health Technology \(SIGHT\)](#)

To inspire and empower UG students to brainstorm and create health technology innovation for sustainable implementation in developing regions

Visited Indonesia and Cambodia to initiate community education programs

Undergraduate Research Opportunities Program (UROP)

Opportunity for UG students to engage in academic research

100+

projects supervised by engineering professors per year

Global Exchange

Bountiful Exchange Opportunities for Engineering students

Study Overseas at one of the

120+

Host Institutions

in 20+ countries/regions, including USA, Canada, UK, Germany, France, Spain, Sweden, Australia, New Zealand, Singapore, Japan, Mainland

NORTH AMERICA

EUROPE

ASIA PACIFIC

4000+

engineering students have participated in the exchange programs

Experiential Learning

HKUST Robotics Teams have earned from local and international robotics competitions

130+

awards as of date

Undergraduate Student-initiated Experiential Learning (USEL) Program

has supported

~100

projects as of date

Industrial Exposure

80+ %

of our graduating class have internship experience during their study

Co-op programs in collaboration with industrial partners, e.g. Boeing, CLP, MTR, Microsoft, Towngas

Entrepreneurship Education

Support innovation and entrepreneurship on the HKUST campus

Transfer knowledge from university to community and society

1,645 startups incubated

Fostered **9** unicorns, 6 of which are from School of Engineering
