**Introduction to Embedded Systems**

ELEC 3300

4 Credits

Pre-requisites: COMP 2611 OR ELEC 2300 OR ELEC 2350 OR ISDN 4000F

**Name:** Tim WOO

**Email:** eetim@ust.hk

**Office Hours:** By email appointments

**Course Description**

This course is designed to teach techniques on how to integrate machine-level software and hardware in ARM-core microcontroller based systems. It makes use of industry-standard techniques and technologies, from which students can interface, design and program microcontroller systems. The task of the course will be to complete six laboratory experiments which address different aspects of hardware/software interfacing, and one large microprocessor/microcontroller based project which should result in the design and implementation of a small working embedded system.

**Assessments:**

<b>Assessment Task</b>	<b>Contribution to Overall Course grade (%)</b>	<b>Due date</b>
In-class activities	8%	Week 1 to 10
Homework assignments	10%	Week 3, Week 10
Laboratory experiments	18%	Week 2 to Week 7
Preliminary proposal discussion (peer)	4%	Week 5
Final proposal presentation	6%	Week 7
Interim project demonstration	9%	Week 10
Final project demonstration and presentation	40%	Week 13
Final project report	5%	Week 13

**Required Texts and Materials**

No specific Text Book

**Additional Resources**

STMicroelectronics STM32F103ZET6 Datasheet

STM32 Reference Manual

STM32 Cortex M3 Programming Manual
