

Course Code Course Title
COMP 1991 **Industrial Experience**

Course Description

Full-time internship training for a period of at least six weeks in an organization or company recognized by the Department for providing qualified internship training relevant to the computer science and engineering profession. Cantonese or other working languages may be used in off-campus trainings and internships, in some situations. For students of the Department of Computer Science and Engineering in their second year of study or above only. Internship coordinator's approval is required for enrollment in the course. Graded P, PP or F.

List of Topics

Those who fail to take part in internship training may be approved to fulfill the COMP 1991 requirement by taking industrial training modules during the summer of Year 3.

Currently there are three industrial training modules for COMP students:

- Linux System Administration
- Linux Network Administration
- Windows Server Administration
